Would You Eat Corn Husks

to get at the corn? Of course you would not. Then why should you take the greasy oil of the cod's liver to get the valuable medicinal elements contained therein? But it is the medicinal elements enveloped in the oil which represent all the tonic and curative properties of cod liver oil.

In Vinoli you get all of the medicinal curative elements of cod liver oil actually taken from fresh cod's livers, but no oil. The oil is thrown away for the reason you throw away the corn husks.

Our local druggist, G. E. Greene, says: "Knowing the wonderful medicinal, curative and body-building properties of Vinoli, I wish every person in Brattleboro who is overworked, run-down, debilitated, every old person, every weak woman, every sufferer with chronic colds, bronchitis or incipient consumption, would try Vinoli on our offer to return money if it fails to benefit." G. E. Greene, Druggist.

Note—While we are sole agents for Vinoli in Brattleboro it is now for sale at the least drug store in every town and city in the country. Look for the Vinoli agent in your town.
